*Get to the heart of the
Performance Issues you cant put
your finger on !*

Tima's Operational Excellence Review is a department focused process driven review that will give you a base line of insights impacting on performance & productivity.

Our seasoned executives with seasoned global experience to solve your; Production, CI, Supply Chain, Logistics & Warehousing (incl Inventory Management), Engineering, Site Management, People Motivation and Engagement.

We can help you & your team by providing; training, coaching, & applied methods of manufacturing excellence, business transformation, operational excellence, business & continuous improvement, resource planning, as well as plant optimisation modelling, performance management, revenue enhancement, cost reductions or to get your projects back on track.

It is best practice to undertake a review periodically or when key staff leave. Other reasons for doing a review;

- morale falling, staff tension & conflict or high staff turnover.
- reject rates are up, failing quality audits, low productivity or not meeting KPI's

What you get

- **Review of the current plan & key data**
- **A Proposed 'roadmap' for improved productivity**
- **1:1 Support for Frontline Managers & Owners**
- **Participate in meetings & provide corrective data**
